

Food Facility Operators Beware!

Be advised, there has been an increase in fraudulent activity during this vulnerable and unprecedented time. There are reports of individuals impersonating themselves as governing officials from our Department. If you are unsure of their credentials, as an official Santa Clara County Environmental Health Specialist, we are required to provide two pieces of identification:

- An official photo County I.D. badge with our name, County seal, and Division name.
- A County business card with our name, title, department address, main office phone number, direct phone number, direct email address and County website.

Our staff have been making phone calls to obtain email addresses for the purpose of distributing information regarding the COVID-19 event and its affect on food business operations. You may also provide your email address through our department email. Please include the name of your food facility, facility i.d. number and the email address which you would like to be contacted for important information regarding your food operation. If you have any questions, you may call our main line at (408) 918-3400 or email us.
